Shortcode ?

[i-am-a-shortcode]

A shortcode is a **WordPress-specific code** that lets you **do nifty things** with very little effort. Shortcodes can embed files or create objects that would normally require lots of complicated, ugly code **in just one line**.

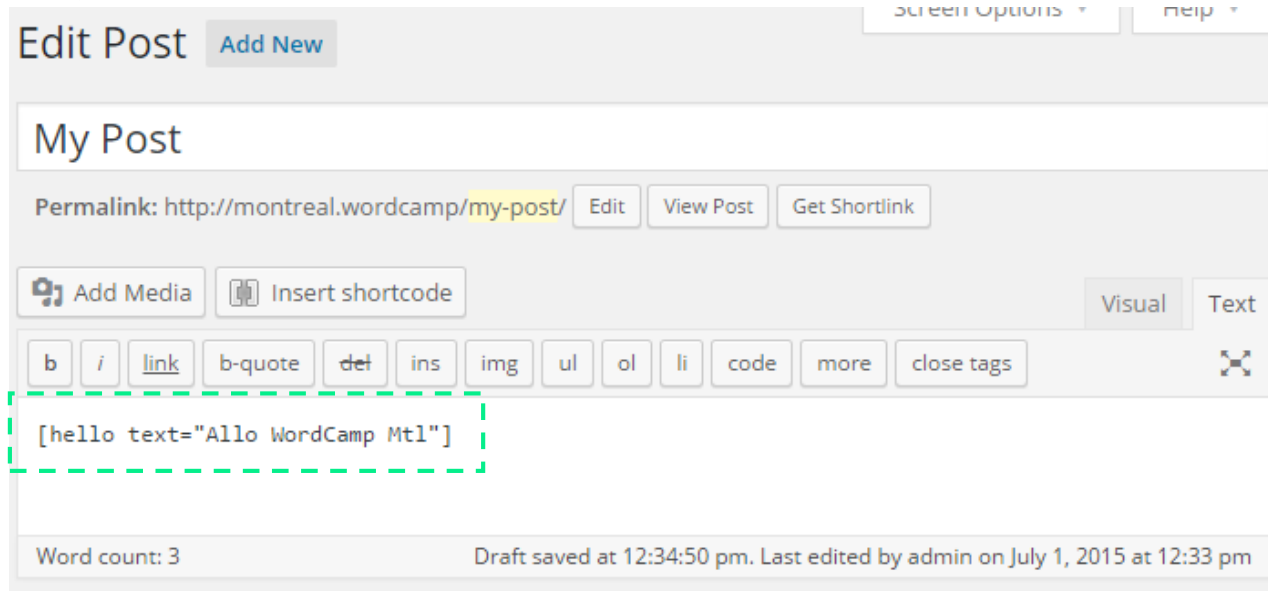

Shortcode = shortcut.

```
<?php
function hello() {
    return "Hello WordCamp Mtl !";
}
add_shortcode( 'hello' , 'hello' );
?>
